## SUMMARY

During my internship I designed posters, social media posts, corporate web design, and e-mail templates. I worked several companies related to my field and after that I started to work as a freelancer. I am also interested in 3d modeling, rendering, web design (front-end), and game engines such as unreal engine and Unity. I wrote short narratives and I've tried to apply them in basic examples. After all these experiments in different mediums, I decided to improve my UI/UX skills because I really like to solve some problems via design systems and I also love to discover new color palettes, fonts, interactive elements and how these materials affect human understanding and psychology in a right way.

## EMPLOYMENT HISTORY

**Web Designer Specialist at TNA Energy, Ankara**
April 2015 — September 2015

- Designed a user interface animation for a web application, increasing user engagement by 60%
- Developed a modular, single-page web application in Html/Css that incorporated responsive design principles

**UX/UI Designer at IQ Motion, Ankara**
November 2019 — March 2020

- Optimized the front-end user interface for improved UX/UI
- Conducted user research and interviews to gain insights into customer needs and behaviors, resulting in a more user-friendly design
- Developed wireframes and prototypes that accurately reflected the desired user experience
- Created detailed specifications and documentation for developers to ensure a consistent design across the platform

**Web Designer at HOBITEK LTD, Ankara**
September 2020 — January 2021

**Freelance UX/UI Designer at Upwork**
